

## 6e

Climate Emergency is good first step.  
Carbon footprint of most residents probably exceeds national average.  
Need to seek to find ways to galvanise action to reduce this and help visitors do likewise.

EV charging point? Any new housing development should have a minimum tree presence

Bulk order for solar energy to get economy of scale

Concentrate on small achievable projects. Some visitor info on how to look after the Roseland. Simple measures to engage purpose of cherish and preserve

community wind turbine or waste incinerator (partner with CTC Waste)

concerns over damage to seabed

need Emergency Plan - there is no Climate Emergency

Harbour area needs an action plan. Downpour runoff needs addressing

Main threat is sea level rise and climate change

balance between preserving local environment and addressing climate emergency. Favourable attitude to solar and wind farms

Possibly good idea but many houses on road front not easy to make more efficient

## 11a Topics not addressed

No mention of need for care in Parish for our ageing residents. Community orchard/community horticulture.

Voluntary visitor tax to fund environmental projects

Keeping school open which is dependent on social housing being available keeping young families in village

Double tax on 2nd homes could affect tourism and employment

Activities for younger people

If more housing need more shops - esp butcher, greengrocer - which will need supporting.

Wealthy second home owners should be invited to provide financial support to local causes. Too many public hall available

Car parking - not enough and needs to be cheaper. Place Ferry inefficient

Car parking - esp in Pedn Moran, Buckeys Lane, Freshwater Land

Health provision, policing, general attractiveness & tidiness

Restrict large buildings esp if second homes

All important issues have been covered

what emergency? Coldest summer ever!!	parking on Marine Pde should be restricted.
EV charging points	electronic bus arrival display. Maintain paths, kerbs & bus shelters
Typed tome attached. Emphasis should be on environmental protection esp local conservation. Stop polluting posters: large posters in AONB are violations. Vision for Environmental Action Plan does not prioritise environmental protection. Preserving our natural environment at local level has low profile but is essential	antisocial behaviour - esp drugs - is a problem
Parish not likely to have a major impact on global issues	Business accn needs to be fit for purpose (eg butcher and baker inadequate?)
cannot be solved a parish level	missing a reasonably priced child friendly sit in eat in restaurant
REACT is not local enough - need local wind turbine. Detailed suggestions provided. Encourage residents growing food.	upset by 2 types of second home owner: council tax & business rates. Not fair!!
with what budget? And what tangible achievable outcomes?	land & housing are the only important aspects - the rest will follow naturally
all too vague	Car sharing. Parish based minibus.
many people don't even accept global warming as a problem: we are, as a species, hurtling towards a disaster	Need a pub in St J
natural environment of Roseland must be protected. Parish should not use resources to counteract climate change	Needs more permanent car parking. Main tourist season is getting longer
more detail needed	airbnb & holiday lets should be treated differently from second homes
Disbanding environment group of PC is disgraceful	local services: child care, medical, dental, activities for kids, indoor play area etc
I don't believe it will happen	Do we have adequate sports facilities? Encourage exercise

action to preserve our natural landscape at local level is a high priority      Contractulations on your thoroughness

I don't see what can be done locally      second home ownership has a negative effect on parish and community

the onus for climate change strategy lies with the higher echelons of Govt      too many of these questions have multiple qs within them

Challenging for a small rural parish to make meaningful impact. We have invested as individuals      What ratio residents/holiday makers is acceptable?

Action not waffle needed at parish level. Environment impacts everything      AONB has not been considered. Think of true community not visitors and commercialisation

Later ferries, Gym & swimming pool.

AONB is not considered. You are pretending to be interested but it is not genuine

Edn & childrens facilities. Roseland Centre a step in the right direction

Activities for children

Alternative energy solutions

## 11b Missing from Parish

Family affordable housing

Social and affordable housing

transport. Medical. Elderly social care youth services

Decent shopping - esp food (we have a much better Coop at home)

housing

Incentives for families and young people to live on Roseland

empty homes, public WC, potholes & pedestrian safety. The bones of management exist - do not destroy them

Respect for the environment, moving away from obsession of making money from tourists at expense of local community, environment and occupied housing.

Housing for locals. Workspace facilities

## 11c Anything else

The retention of a vibrant community is about much more than just the provision of suitable/affordable housing and requires effort and change from all elements of the community to sustain what is most precious about the parish.

Encourage the solar panels on shed roofs and over carparks rather than eyesores on agricultural land

greater conservation consideration

Village events where tourists are made welcome. More water based activities for children. Fishing tackle shop.

how does this fit with the Roseland Plan, Cornwall Housing Strategy and Govt Housing Strategy? Need more externally validated research and funding for ideas

butcher

affordable housing for locals. No shared ownership reasonably priced at market rate

land & housing

Should St J have own generator?

affordable housing for local people

A strategy to affect holiday to full time ratio having decided what is optimal. A strategy to promote and support shoulder season tourism

need something for 11-17 year olds

do not approve of this at all

free public toilets, pavements to reach Primary School, street lighting

Rental property for locals lowers dignity and does not feel secure. Mixed developments exacerbate local divides between 'haves' and 'have nots'

needed better proof reading  
a 10 year vision is a good way forward

stop gross offensive commercialization  
St J needs to be made safer for children

Need to understanding needs for each part of community. A strategy to limit over-represented parts of community.

I doubt that this will have any different impact to 2004 Local Plan. Some second home owners contribute more to village life than others.

What is evidence for people wanting to live in village if little employment?

**Please, please, please declutter signs from the road network.**

Young people

care for the AONB. Shrinking community not acknowledged

natural landscape is the jewel in the  
crown

Not much! It's lush here

The problems here are no different to  
the rest of the country

More bins for dog poo required and  
signs telling people to clean up after  
dogs

Butcher and greengrocer
